

COMPANY PROFILE

DRONIUX
www.droniux.com

As a premier Chinese drone manufacturer, we design and build high-performance light show systems from the ground up—with full control over R&D, assembly, testing, and delivery.

Our flight control platform integrates advanced algorithms, real-time communication, and intelligent formation logic for seamless large-scale coordination. Each drone delivers centimeter-grade precision via multi-constellation satellite positioning, with redundancy and fail-safes ensuring reliable flight in any environment.

We offer complete, ready-to-fly systems to event companies, rental agencies, and show operators worldwide.

In 2019, President Xi visited us and met founder Dr. Qi (right) — the only civilian drone firm in China to receive such a visit.

DRONE PRODUCTION & SALES

We manufacture and export drone light show systems to worldwide. All units undergo rigorous in-house testing before shipment and are fully certified for international deployment—ready to fly wherever you are.

DRONE RENTAL

Monthly rental with a 2-month minimum. ATA member countries enjoy duty-free temporary importation with no deposit required. Package includes drone transportation, choreography design, and on-site piloting—with NO monthly show limits.

DRONE SHOW SERVICES

Full-service drone show production worldwide—including transportation, custom choreography, and on-site piloting for flawless execution at any event.

GLOBAL CREDENTIALS

Our drone systems hold full international certifications—FCC, CE, KC, PSE, TELEC, and MIC—for global compliance, with DGM and MSDS documentation ensuring battery safety.

As China's premier drone manufacturer and a leading global provider of drone light show services, our flagship systems have delivered spectacular performances across the world—redefining what's possible in the night sky.

Model III

Flagship Light Show Drone

Extended Flight Time

20+ min
performance time

Enhanced Safety Assurance

slow descent &
geofencing systems

Ultra-Precise Navigation

centimeter-level
positioning accuracy

Payload Versatility

supports dual
cold fireworks

Vibrant Visual Performance

25W full RGB LED lights

Compact Takeoff Footprint

1.38m min spacing
for confined spaces

It delivers exceptional anti-interference capabilities, centimeter-level positioning accuracy, and a dual-pyrotechnics payload. Widely recognized as the industry's most cost-effective light show drone.

Model III is the flagship light show drone system, engineered for precision, versatility, and reliability. With 20+ minutes of flight time per charge, it delivers extended performance for complex choreographies. Each unit features 25W full RGB LED lights for vibrant aerial displays, and centimeter-level GPS/RTK positioning ensures flawless fleet synchronization. Model III supports cold fireworks payloads of up to 100g, adding dramatic visual effects to any show. Equipped with slow descent and geofencing, it provides comprehensive safety assurance for both audiences and aircraft. With a compact 1.38m minimum launch spacing, Model III adapts to both confined venues and large-scale events, offering operators unparalleled flexibility without compromising performance.

MODEL III SPECIFICATIONS

Total Weight	550g
Wheelbase Size	240mm
Speed	6m/s
Wind Resistance	L5
Endurance	33min
Spacing	1.5m
RGB LED Power	25W
Communication Mode	5G/Wifi/Radio
Slow Descent System	✓
Geofencing	✓
Pyrotechnics Payload Capacity	≤100g

Model X

Next Generation Light Show Drone Built for High-Frequency Shows

INTEGRATED CHARGING TAKE-OFF AND LANDING CASE

Model X is the latest-generation drone light show system, redefining efficiency and endurance. With 10-minute ultra-fast battery charging via the integrated take-off and landing case, fleets can be rapidly replenished and redeployed in record time. Each unit delivers over 30 minutes of flight time, features 30W RGB full-color LEDs, and is equipped with four built-in strobe lights for enhanced visibility. Model X supports cold pyrotechnics payload of up to 100g. Beyond standard slow-descent systems and electronic geofencing, Model X is additionally equipped with a parachute deployment system — ensuring maximum safety for both the audience and the aircraft in extreme scenarios.

DRONIUX

Model 400

PROFESSIONAL PYROTECHNIC DRONE

It's purpose-built for aerial fireworks, carrying up to 12 cold pyrotechnics with a 1000g max payload. In-air electronic ignition allows independent, precisely timed firing for complex sequences synchronized with drone lights.

MODEL 400 SPECIFICATIONS

Total Weight	1400g
Speed	6m/s
Wind Resistance	L6
Endurance	35min
Spacing	2m
Communication	5G/Wifi/Radio
Slow Descent	√
Geofencing	√
Payload Capacity	1000g
